

ME550DFB

Analog ECG Output Adapter for connecting cables from defibrillators to pacemaker programmers.

Adapts the ECG analog output of most current defibrillators

The only adapter you need to connect the cable (including the cable that comes with the programmer) between most current model defibrillators and your programmer. The ME550DFB adapts the analog output of most current defibrillators to accept the cables ¼" phone plug.

- Medtronic
- Medtronic
- PhysioControl
- Zoll Medical M and CCT Series
- HP/Philips
- GE Healthcare/Varquette defibrillators
- MRL/WelchAllyn defibrillators

*This product has been discontinued.
Please refer to our upgraded version
ME550DFB3 for connections between the
Pacer Programmer and the defibrillator.*

Operating Instructions

You do not need multiple defibrillator analog ECG output adapters to connect the most popular defibrillators. Simply plug your programmer cable ¼" phone plug into the ME550DFB, **move the protected slide switch** to select the appropriate model defibrillator and plug the ME550DFB into the analog output connector on the defibrillator you have chosen.

Universal Defibrillator Analog ECG Output Adapter ... ME550DFB
