

ME550DFB3

Analog ECG Output Adapter for connecting cables from defibrillators to pacemaker programmers.

Adapts the ECG analog output of most current defibrillators to be a ¼" phone jack

The only adapter you need to connect the cable (including the one that comes with the programmer) between most current model defibrillators and your programmer. The model ME550DFB3 Analog ECG Output Adapter together with your programmer cable allows the following defibrillator connections:

- Physio-Control defibrillator LIFEPAK 12/15
- Physio-Control defibrillator LIFEPAK 20/20e
- Physio-Control defibrillator LIFEPAK 20e with Code Management Module
- Physio-Control defibrillator LIFEPAK 9 (plug the cable directly into the ¼" phone jack)
- Zoll R Series defibrillators (newer units with the 5 pin female output connector)

Operating Instructions

You do not need multiple defibrillator analog ECG output adapters. Simply insert your programmer cable ¼" phone plug into the **ME550DFB3**, and then connect one of the defibrillator connectors to the corresponding defibrillator analog ECG output.

Universal Defibrillator Analog ECG Output Adapter ... ME550DFB3 ... \$187
